TERRACOTTA FAÇADE SYSTEMS

The façade system
that adds a functional
and aesthetically appealing
finish to any project

Terraçade is simple and easy to install, suitable for major architectural developments, industrial complexes, commercial projects or residential applications.

Terraçade provides practical as well as visually appealing solutions to many design obstacles. This authentic terracotta product boasts design flexibility and simple installation to stamp every project with stylish individuality. It is ideal for existing structure redesign or continuity of colour and shape in new construction.

Available in a large range of colours and finishes, the Terraçade system will enhance any project large or small. The unique design of Terraçade allows for it to be used on buildings up to thirty storeys high and the natural properties of terracotta ensure durability, colour fastness and a life long maintenance free finish

Quality guarantee

Brickworks Building Products continued commitment to quality and innovation ensures that Terraçade will remain the benchmark for excellence for many years to come.

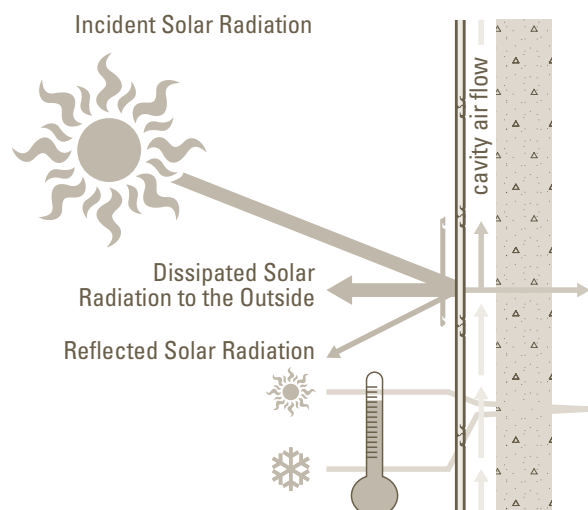

Terraçade has a warranty of twenty years on the system and 100 years on colourfastness and durability of the tiles.

Contact Terraçade to have an architectural consultant visit you with samples and technical information, or to discuss your next project.

Benefits of Terracotta

Durable and sustainable for life.

Terraçade is an open rainscreen system, so it assists with energy reduction throughout the building by enabling air to flow between the substrate wall and cladding system. This flow of air between the cladding and the substrate assists with keeping the building cool and also helps to remove any moisture that may be present within the cavity. The Terraçade tile is made from natural and recycled materials and the majority of the system is not only reusable but can also be recycled. Combining the innate durability of clay, a unique low maintenance design, and the ability to weather atmospheric extremes, Terraçade is a long lasting, cost effective and environmentally sound choice.

Terraçade TN

Internal or external, residential or commercial, whatever the application, Terraçade TN offers unrivalled visual impact.

The uncluttered, minimalist lines lend themselves to bold architectural statements, complementing underlying shapes and forms with streamlined refinement.

Striking Colours

The natural tones of the Smooth Range, inspired by the colours of the earth, provide a subtle palette which pleases the eye in perfect harmony with other building materials, such as brick, steel and stone. The Sandblasted and Watermark ranges provide a distinctive and unique feature finish while the Glazed range provides a bold colour statement that ensures a definitive façade is created.

High Quality and Durable

However, Terraçade TN isn't just about the aesthetic. Beneath the striking good looks there is real substance, the natural clay façade system offers architects and builders design flexibility, ease of installation, superb durability and a quality finish that provides endless design options. Terraçade TN is an instant design classic, an investment in style that is sure to stand the test of time.

Introducing Terraçade TN 1200mm

Terraçade is proud to introduce the new TN 1200mm long tiles – the larger tile module provides greater flexibility when creating façade solutions for a wide range of products. The longer tiles utilise the same fixing systems as the 600mm tiles and can be installed in both stack and brick bond patterns. For a striking visual effect, 600mm and 1200mm tiles can be mixed together on the same wall – the façade solution created is only limited by your imagination.

Available Sizes

Tile Module: 600mm x 300mm x 14mm

Tile Module: 1200mm x 300mm x 14mm

Note:

The composition of the raw materials as well as the firing process may cause each run to differ. The resulting colour variation is inherent in the process and part of the appeal of our natural products. The product images in our brochures give a general indication of colour for your preliminary selection. We recommend you also view current product samples.

Terraçade XP

Australia's rich and diverse landscape was the inspiration behind Terraçade XP's earthy colour palette, with a range of natural tones to suit any environment.

Not only will the application of Terraçade XP make a statement of its own, but it will also enhance the aesthetic appeal of the buildings' surrounds and project a distinct Australian flavour.

Application Flexibility

Industrial, commercial and multi residential projects will benefit from Terraçade XP's highly distinctive and individual finish. It is a contemporary and innovative alternative to other façades, giving greater flexibility to designers and architects. Terraçade XP has the flexibility to suit any project and will enhance the surrounds with its natural clay blends.

Stylish Appearance

The beauty of Terraçade XP is that it can be used as a façade for an entire building or as a creative focal point to an innovative design. Its simple yet stylish appearance will complement and provide a stunning finish to any project.

Stylish Appearance

Terraçade XP provides the natural beauty, low maintenance and longevity of terracotta.

Terracotta tiles are robust, colourfast, durable, and have an extremely long service life. The exposure grade classification of the tiles attests to the product's suitability for all environments.

Striking Colours

Terraçade XP is available in six colours with two profiles, linear and smooth. With a choice of six natural clay colours to suit any construction, Terraçade XP will add a creative and individual finish to your project, large or small.

Installation

Terraçade TN

The Terraçade TN system is easily installed as the lightweight tiles are captured and supported by a purpose designed vertical suspension rail. The innovative system can be installed directly onto a timber framed, steel framed, concrete or masonry structural wall. For framed structures, an optional waterproof membrane is supplied by Terraçade as part of the system's tested performance. In addition, a full range of trims are available in anodised or powder coated finish to complement or highlight your design.

Dry-Treat Sealers

While Terraçade TN offers a low maintenance solution to building façades, there may be instances where more severe conditions exist, such as high traffic areas prone to graffiti. For added protection we recommend Dry-Treat sealer (www.drytreat.com).

Membrane

The high water vapour permeability of the membrane allows the controlled escape of vapour from within the frame while restricting the ingress of rain and moisture.

Terraçade XP

The Terraçade XP system is easily installed as the tiles are captured and supported by purpose designed aluminium extrusions. The horizontal rails are fixed to a timber framed, steel framed, concrete or masonry structural wall.

Terraçade XP has additional components including aluminium extrusions for the detailing of external and internal corners, window and door surrounds and edge trims. These trims can be customised by either anodising or powder coating to complement or highlight your design.

Dry-Treat Sealers

While Terraçade XP offers a low maintenance solution to building facades, there may be instances where more severe conditions exist, such as high traffic areas prone to graffiti. For added protection we recommend Dry-Treat sealer (www.drytreat.com).

Membrane

The high water vapour permeability of the membrane allows the controlled escape of vapour from within the frame while restricting the ingress of rain and moisture.

100 YEAR PRODUCT WARRANTY

Terraçade tiles are offered with a 100 year Product Warranty. This means that for a period of 100 years your terracotta wall tiles are guaranteed to maintain their durability and colour.*

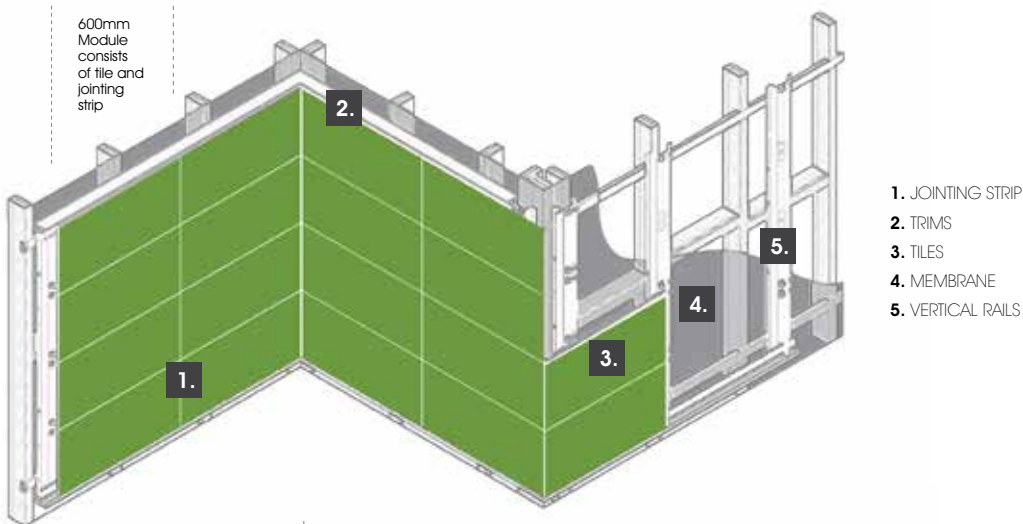

20 YEAR SYSTEM WARRANTY

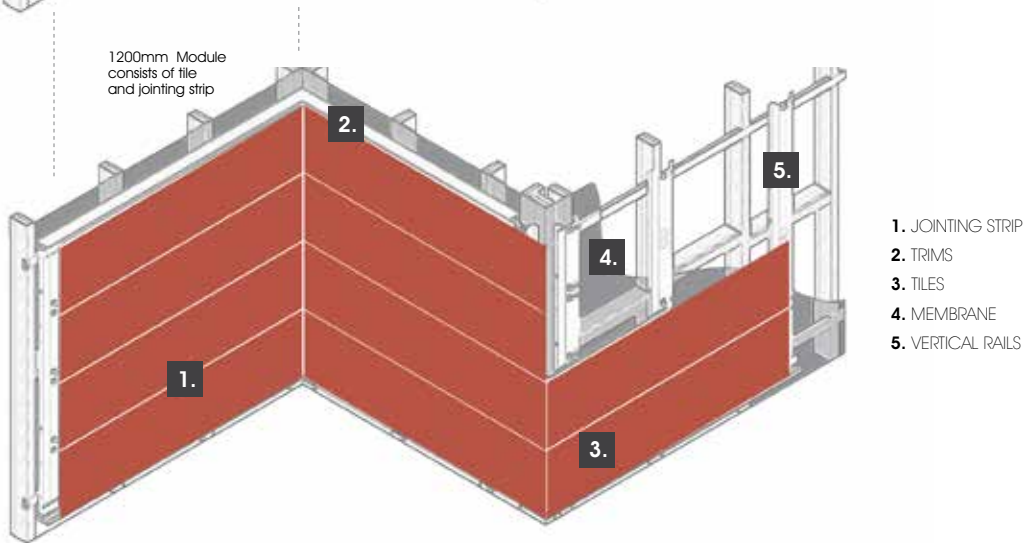

All Terraçade systems installed as per our recommendations will receive a 20 year warranty.*

* Please refer to warranties on the Terraçade website for full warranty terms and conditions

Terraçade Baguettes

A stylish privacy and ventilation system.

Terraçade baguettes can be used for both practical and decorative applications on building façades. The system can be used to provide privacy screening, permanent ventilation and shading or simply to apply a stylish finish to any residential, commercial or industrial project.

The product can provide screening on multi residential balconies, across windows on office buildings or act as a decorative element for front offices in industrial complexes.

The sleekline look provided by the Terraçade baguettes is also perfect for residential pergolas, beer gardens, pool areas, and outdoor seating areas providing a modern shading and privacy solution. The applications of this product are endless.

Terraçade baguettes come in a range of six stylish, natural colours.

About Brickworks Building Products and associated companies

BRICKWORKS

Brickworks Building Products is one of Australia's largest and most diverse building material manufacturers. Under the Brickworks Building Products umbrella are some of Australia's best known building materials brands.

Products include bricks, pavers, masonry blocks, retaining wall systems, precast concrete panels, concrete and terracotta roof tiles, timber products and specialised façade systems.

Austral Bricks add distinct style to any type of home. Their natural colours and textures enable you to create striking façade contrasts or more traditional neutral colour tones. By investing in new technology Austral Bricks now produce bricks with a variety of surface finishes, exciting colours and different sizes.

BOWRAL BRICKS®

The unique combination of traditional craftsmanship and modern technology will ensure that the Bowral Bricks brand will remain the benchmark for brick excellence for many years to come.

With a heritage reaching back to 1862, Nubrik premium-quality bricks are still moulded the traditional way on century-old presses. Their time-honoured expression of authenticity and elegance is acknowledged by architects, builders and discerning homebuyers who also value their rich colour blends, solidity and crisply-defined edges.

Since 1853, Daniel Robertson has helped build Australia with building products that combine craftsmanship with architectural excellence. In a world of mass production, where qualities are constantly compromised, Daniel Robertson premium-quality clay bricks are highly prized for their unique character, earthy appeal and individual charm.

Austral Masonry is a leading manufacturer and supplier of concrete masonry products focused on providing functional but stylish solutions to the civil, residential, commercial and industrial building and construction markets.

Our passion is to create products to meet the technical and functional demands of the building industry, while also delivering architecturally striking and fashionable finishes to completed building projects. Our range of products includes standard grey concrete blocks, coloured architectural concrete blocks with a range of different finishes and a comprehensive range of retaining walls, pavers and garden edging.

^ Bristile Roofing

^ Auswest Timbers

^ Terraçade

In just a few years, Austral Precast has become Australia's premier supplier of high-quality, innovative and customisable precast concrete product solutions. Using state-of-the-art technology, production techniques and systems, our precast division produces a diversified range of wall, floor, column, and client-specific precast solutions. To meet the construction industry's ever-increasing demands, the company operates from five plants located along the eastern seaboard and in Western Australia.

For almost a century, Bristile Roofing has delivered stylish and innovative roofing products for Australian homes. Bristile is now one of Australia's largest manufacturers and installers of quality roof tiles and the exclusive Australian distributor of La Escandella premium-quality terracotta roof tiles from Spain. Product innovation, manufacturing expertise and first-class service guarantee a strong, low maintenance roofing solution that will look great and perform superbly for generations.

From production facilities in Western Australia, Victoria and the ACT, Auswest Timbers manufactures a diverse range of timber products. Jarrah, karri and chestnut timbers are processed into a range of decorative, seasoned products for furniture and joinery, flooring, decking, staircase components, veneers and fence screening. Green structural timbers are also processed for mine, wharf and rail track construction, as well as for floor joists, roofing timbers and roof tile battens.

Façade systems are a cost-and time-efficient approach to cladding commercial and upscale residential buildings. The Terraçade™ system, developed in Australia by Brickworks Building Products, combines the visual appeal and colourfastness of terracotta with the low maintenance and functional efficiency demanded in today's competitive market.

Pronto Panel is a non-load bearing panel system that can be used both internally and externally. Pronto Panels durable, lightweight and simplistic nature makes it perfectly suitable for both residential and commercial applications.

INEX>BOARDS

INEX>BOARDS provide a range of high performing lighter weight materials for the construction industry. **INEX>BOARDS** offer a superior, yet price competitive, environmentally friendly alternative to fibre cement and plasterboard products. Critically the products are both low carbon and high performing, whilst at the same time being affordable, delivering to the construction industry a better, safer and cost-effective solution.
