Austral Bricks
continues to
build its reputation
for delivering
top quality

The Austral Bricks story

With a history that extends beyond 100 years, Austral Bricks has a proud tradition of 100% Australian ownership. Today, Austral Bricks operations consist of 18 factories, across six states.

Our manufacturing plants combine state-of-the-art technology with the company's long experience in the manufacture of bricks and pavers to exacting Australian standards, resulting in a world-class, high-quality product.

Each batch of bricks and pavers are graded at various stages of the manufacturing process and laboratory tested to make sure our products meet strict Australian standards. Recognised as one of Australia's leading manufacturers of quality clay building products, Austral Bricks resources extend beyond factories and clay reserves, to its team of dedicated employees.

A national research and development program co-ordinates all new product

development activities to ensure that Austral Bricks continues to build its reputation for delivering top quality, innovative products that address the needs of the building and construction industry.

From humble beginnings, Austral Bricks has grown to be one of the leading, quality clay product manufacturers in the world and a truly great Australian success story.

Build a home you can live in happily ever after, with Austral Bricks

From the minute you choose to build a brick home, your decision will start paying dividends – lower maintenance costs, lower energy charges, lower fire risk, reduced termite treatment and better environmental outcomes for the whole family.

All of this and the guarantee that your investment will continue to save money and appreciate in value for the generations to come; your children's children will reap the benefits of building with brick.

It's a choice that will last several lifetimes and beyond. Look around the world's oldest cities; brick buildings have withstood the ravages of the ages. Look around today's newest suburbs and you'll find the most modern, stylish and practical homes are built of brick.

Building your home with brick ensures it remains weatherproof, durable and attractive for years to come. It's cost-effective because brickwork doesn't need painting, rendering or any other coating to preserve its good looks and durability. Unlike other materials, bricks keep your home stylish without all the hard work. Better still the natural texture of brick actually hides dirt, unlike paint finishes which highlight grime.

build for living

For more information about building a comfortable home, pick up a copy of our Build for Living brochure from one of our Brickworks Design Centres and Studios, or visit our website
www.australbricks.com.au

2 Source: "Think Energy Savings", Think Brick Australia
* When combined with common insulation measures

The benefits of clay bricks keep stacking up

When planning to build a sustainable home and a comfortable life, you have a lot to consider. With their complete range of cost, comfort and style benefits, clay bricks are the one and only choice.

Clay brick is secure, an investment for life

As one of the world's most sought after and trustworthy sources of sustainable building materials, clay bricks are renown for their strength and secure investment potential. The quality construction, quiet calm and ageless appeal of a solid clay brick home will protect your family for generations to come.

Clay brick is energy efficient

For energy efficient warmth in winter and cool in summer, clay brick combines perfectly with passive building design to harness natural sources of energy. The natural density and thermal insulating qualities of clay moderate building temperature and reduce energy consumption rates, to provide year round comfort and savings.

Clay brick is low maintenance

The most endearing quality of a clay brick home is its ability to withstand the test of time, even under the harshest environmental conditions. Clay bricks don't need paint or other treatments to maintain aesthetics and durability. They are strong, reliable and relatively maintenance free, saving you on the cost and time required to upkeep your home, compared to lighter weight materials.

Style and design

Clay bricks add distinct style to any type of home. Their natural colours and textures enable you to create striking façade contrasts or more traditional neutral colour tones.

By investing in new technology Austral Bricks have been able to introduce new kiln firing techniques to produce clay bricks with a variety of surface finishes, exciting colours and different sizes.

The result is a wonderful range of clay bricks for you to build a stylish, contemporary home.

Clay brick is sustainable

Made from organic minerals found in shale and local, naturally abundant sources of clay; clay brick's long-lasting life cycle offers ongoing environmental and health benefits. Durable, re-usable, free from contaminants and naturally resistant to pests or fire, clay brick is safe to live in, making it the ultimate material in responsible and economical home building design.

Clay bricks are fully reusable

They are one of the very few materials that can be reused (not just recycled) with all their original qualities intact. And if they are consigned to landfill, clay bricks are chemically inert and can't pollute groundwater or contaminate soil.

Clay brick manufacturing is highly efficient

Austral Bricks' super-plants use the latest high-tech automated controls and a high-efficiency kiln to achieve energy savings of 30 percent over previous technology. Our plants are also water self-sufficient, have low emissions and operate on zero waste.

Clay bricks out perform concrete bricks

Clay bricks are both stronger and have a lower rate of absorption, making them easier to work with. Unlike concrete bricks, clay bricks are also colourfast and will hold their aesthetic beauty for the life of the product.

Ultra Smooth,
the new face of
brick in Australia

Ultra Smooth Jazz

Ultra Smooth Rhythm

Ultra Smooth

Ultra stylish

Produced using the latest in advanced ceramic technology, we have created the perfect feature brick with a refined matt face that's ultra smooth.

Complemented by five ultra stylish colours, Ultra Smooth reflect ultimate harmony with contemporary architecture.

Add a distinct premium feel to any home or project

Designa Basalt

Using the finest quality real stone, precision cut and beautifully finished, Designa Basalt is the ideal feature for both internal and external use.

The Designa Basalt range is a collection of natural stone bricks. These bricks are cut from Basalt and finished in three different surfaces and two sizes.

Like all bricks, they can be easily laid by traditional bricklayers using a conventional mortar bed.

To protect the face, each brick in the Lava Stone and Shadow Stone ranges are coated with a thin plastic film.

Designa Basalt will complement any home as a feature panel for both interior and exterior walls.

Being a natural stone product, it is recommended that once laid, the bricks be sealed. Austral Bricks can assist with cleaning and sealing recommendations.

Like all Austral Bricks products, Designa Basalt stone bricks are virtually maintenance free, totally weather resistant, long lasting, have high thermal mass for better energy efficiency and add a distinct premium feel to any home or project.

Camilla for Austral Bricks

An explosion of colour

Camilla Franks has been a style ambassador for Austral Bricks since 2012. She has now lent her name to a vibrant new range of bricks.

Austral Bricks newly-released Camilla Franks Collection high-gloss bricks is inspired by her love of the art and architecture of Mexico. And in true Camilla style, she didn't hold back when it came to colour.

The first release of the Camilla Franks Collection comprises five lively shades, ready to lend a splash of colour to your next bespoke project.

Only Austral Bricks has the tradition and experience to craft truly authentic sandstocks

Governors Wakehurst

Mineral Sandstocks Black Diamond

Governors

Traditional sandstocks

The Austral Bricks Governors range of sandstocks is crafted with all the traditions and experience that only one of Australia’s largest and most experienced brick makers can offer. We use only the finest quality clays and shales to give the Governors sandstocks their special appeal.

What makes a sandstock brick different to a normal brick is the forming process. The soft clay clot is rolled in sand prior to being “thrown” into a mould called a stock, hence sand-stock. Like the first sandstocks made in colonial times, Governors are solid with a double facing, unique features only found in authentic sandstocks. Only Austral Bricks guarantees the authenticity, quality and superiority of their sandstocks with a 25 year structural Certificate of Guarantee.

Bricks & mortar explained

Extruded bricks

Extruded bricks are the versatile staples of our brick range. They are widely used in building applications from everyday housing to large, architect-designed commercial projects. Their manufacturing process makes possible a vast range of surface finishes, from smooth to sandy, highly textured to glazed. The colours of extruded bricks are equally diverse, covering the spectrum from pale off-white and grey through traditional red to deep tan and burgundy.

Pressed bricks

Pressed bricks are our premium products, still made on original presses dating back almost a century. This moulding process gives each brick an individual character that is highly valued by architects, builders and home-owners. Their heritage makes our pressed bricks the only choice for period-style buildings but they are equally “at home” in contemporary architecture.

Shapes

Shaped bricks take brickwork out of the square. Their sculpted designs help create distinctive and authentic architectural features such as formed window sills, moulding courses, bullnose cappings and much more.

Mortar colour

The most common mortar colour is mid-grey, often called “natural”. However off-white mortar is becoming more popular. Off-white mortar is made by mixing light colour cement and white sand. Mortar can be coloured, usually by adding powdered or liquid pigments to the mortar as it is being mixed by the bricklayer. Mortar can also be tinted to match the brick colour, giving a very even wall colour.

Mortar finishes

There are four common mortar finishes. The key to understanding mortar finishes is sunlight. A raked finish will cause a deep shadow to form in the mortar joint. This brings out the horizontal lines of the brickwork (and the vertical lines to a lesser extent). Ironed and rolled joints also create shadowlines, but much finer and more subtle. A flush joint doesn’t allow shadowlines to form, giving the wall a more unified look. Using a mortar colour to match the brick will take this a step further.

✔ Mortar finishes

✔ Mortar colour

Natural* Off White* Grey* Black*
* Colours shown are an indication only. Mortar colours will vary depending on the type of cement, sand and pigments used.

Blending and cleaning

Blending

Our bricks are partially blended during packing but this is not sufficient to guarantee a well blended wall. Blending on site is important whether the bricks are single or multi-coloured.

Your bricklayer is a professional tradesman and is responsible for ensuring an even colour distribution in accordance with the blending instructions attached to all our brick packs.

Cleaning

Cleaning brickwork is a skilled process that requires care and is the responsibility of your builder. Your new brickwork should be cleaned after each section is laid as fresh spattered mortar is much easier to remove.

For further information go to australbricks.com.au

Brick range durability

EXP = Exposure grade

Suitable for use in external walls exposed to aggressive environments, such as; areas subjected to salts in the soil, adjacent material or ground water, in coastal areas exposed to attack from windborne salt spray, or retaining walls subjected to fertilisers and ground salts.

GP = General purpose

Suitable for internal and external walls only when above a sheet or membrane damp-proof course and protected by an adequate coping, eaves, roof or similar top covering. These units should not be directly exposed to saline environments.

Solar absorbance rating

In the design of energy efficient buildings, the architects and consulting engineers need to be able to calculate the heat loss or gain of materials used to construct these buildings. For this reason, our product range has been categorised into three colour groups – **Light (L)** < 0.475 **Light, Medium (M)** 0.475 - 0.70 **Medium, Dark (D)** > 0.70 **Dark** – to assist architects and consulting engineers with their calculations.

Choose Austral Bricks

Our clay bricks are made from naturally occurring minerals that are kiln fired to lock in their colour and strength for life. The composition of the raw materials as well as the firing process may cause each run to differ. The resulting colour variation is inherent in the process and part of the appeal of our natural products.

To make your selection process as easy as possible, we recommend that you view examples from some of the following sources before finalising your choice.

Brochures and website

Our brochures and website are an excellent way to narrow your choice from the wide range of bricks available. Please note however, that the product images in our brochures only give a general indication of colour for your preliminary selection.

Brick Samples

Samples of current product runs are available. We suggest that three samples are obtained to give a clearer indication of colour variation.

Display homes

Display homes give an excellent understanding of a full-scale, well-blended brick wall to help you understand the characteristics and proportions of a specific blend.

Display walls

Display walls show typical examples of the brick blend, including the base colour and the proportion of light, dark and average colours. Be aware that the mortar colour and finish will affect your perception of the overall wall colour.

For more information about choosing bricks just talk to any of our Design Centre staff.

10 tips for a smooth delivery

Delivering your bricks, blocks and pavers is the exciting first step in the construction process.

We take pride in efficient and effective delivery as well as working with your builder. Here are a few simple guidelines to help us place your product where you want it, when you want it!

1 Estimate accurately

We will help estimate your requirements to the next 1/4 pack to avoid under-ordering.

2 Not so fast!

Have your product delivered to site at least one working day before work starts. Starting work on the delivery day may lead to lost time due to waiting.

3 Take as many bricks as you can with each delivery

Ordering a full load ensures priority, express delivery and allows bricklayers and paver layers to blend from multiple open packs.

4 Our trucks are big!

We need to know if there are any obstacles such as a dead-end or one-way streets, height restrictions, weight restrictions, clearways, main roads, proximity to schools or hospitals, etc.

5 Is the house or lot number prominent?

Place a 'job sign' on your front terrace or boundary to eliminate any confusion.

6 Site access

If the site is locked, tell us the access times. If you require us to enter through neighbouring land, it is your responsibility to get prior written permission. Provide contact number of someone on-site.

7 Where do you want them?

Tell our sales staff where your delivery is to be placed. We need to know before delivery if packs are to be placed around the site please place signs to indicate your requirements. Our tractors need at least 2.5 metres clear width and 2.6 metres height clearance. Less than 8 packs will be delivered by crane placing on verge.

8 Bricks are heavy!

A tractor with a brick pack weighs about five tonnes. It's your responsibility to ensure the ground and any path or driveway traversed or crossed can sustain this weight. Stormwater pipes are particularly vulnerable to damage.

9 Safety first... and last

Ensure children are well out of the way and restrain your dog during delivery. We will do our best to place packs to your requirements but the driver has the final say when it comes to safety and possible site damage.

10 Talk to an Austral Bricks sales consultant about your delivery needs.

Products and brands available from Brickworks Building Products

BRICKWORKS

Brickworks Building Products is one of Australia's largest and most diverse building material manufacturers. Under the Brickworks Building Products umbrella are some of Australia's best known building materials brands.

Our products include bricks, pavers, masonry blocks, retaining wall systems, precast concrete panels, concrete and terracotta roof tiles, timber products and specialised façade systems.

With a broad product portfolio and manufacturing and sales facilities across Australia, Brickworks Building Products is uniquely placed to service the demands of the building industry.

With over 1200 staff across Australia and New Zealand, we pride ourselves on our commitment to product and service excellence and our leadership position.

Founded in 1908, Austral Bricks is Australia's largest, best-known and most efficient clay brick and paver manufacturer.

Austral Bricks add distinct style to any type of home. Their natural colours and textures enable you to create striking façade contrasts or more traditional neutral colour tones. By investing in new technology Austral Bricks now produce bricks with a variety of surface finishes, exciting colours and different sizes.

The result is a wonderful range of bricks for you to build a stylish, contemporary home.

BOWRAL BRICKS®

When Bowral Bricks began production in 1922, a teenage Don Bradman was still scoring runs for the local side. Today their distinctive dry-pressed bricks are highly valued by discerning architects and builders across the country. The unique combination of traditional craftsmanship and modern technology will ensure that the Bowral Bricks brand will remain the benchmark for brick excellence for many years to come.

With a heritage reaching back to 1862, Nubrik premium-quality bricks are still moulded the traditional way on century-old presses. Their time-honoured expression of authenticity and elegance is acknowledged by architects, builders and discerning homebuyers who also value their rich colour blends, solidity and crisply-defined edges.

DANIEL ROBERTSON

Since 1853, Daniel Robertson has helped build Australia with building products that combine craftsmanship with architectural excellence. In a world of mass production, where qualities are constantly compromised, Daniel Robertson premium-quality clay bricks are highly prized for their unique character, earthy appeal and individual charm.

Backed by a proud history of more than a century of brickmaking experience, NZ Brick Distributors offers New Zealand's most comprehensive range of high quality bricks and pavers in an unmatched palette of colours, textures and sizes, backed by a nation-wide sales and distribution network.

austral masonry®

Austral Masonry is a leading manufacturer and supplier of concrete masonry products focused on providing functional but stylish solutions to the civil, residential, commercial and industrial building and construction markets.

Our passion is to create products to meet the technical and functional demands of the building industry, while also delivering architecturally striking and fashionable finishes to completed building projects. Our range of products includes standard grey concrete blocks, coloured architectural concrete blocks with a range of different finishes and a comprehensive range of retaining walls, pavers and garden edging.

In just a few years, Austral Precast has become Australia's premier supplier of high-quality, innovative and customisable precast concrete product solutions. Using state-of-the-art technology, production techniques and systems, our precast division produces a diversified range of wall, floor, column, and client-specific precast solutions. To meet the construction industry's ever-increasing demands, the company operates from five plants located along the eastern seaboard and in Western Australia.

bristile roofing®

For almost a century, Bristile Roofing has delivered stylish and innovative roofing products for Australian homes. Bristile is now one of Australia's largest manufacturers and installers of quality roof tiles and the exclusive Australian distributor of La Escandella premium-quality terracotta roof tiles from Spain. Product innovation, manufacturing expertise and first-class service guarantee a strong, low maintenance roofing solution that will look great and perform superbly for generations.

From production facilities in Western Australia, Victoria and the ACT, Auswest Timbers manufactures a diverse range of timber products. Jarrah, karri and chestnut timbers are processed into a range of decorative, seasoned products for furniture and joinery, flooring, decking, staircase components, veneers and fence screening. Green structural timbers are also processed for mine, wharf and rail track construction, as well as for floor joists, roofing timbers and roof tile battens.

Façade systems are a cost-and time-efficient approach to cladding commercial and upscale residential buildings. The Terraçade™ system, developed in Australia by Brickworks Building Products, combines the visual appeal and colourfastness of terracotta with the low maintenance and functional efficiency demanded in today's competitive market.
