australbricks®
since 1968
Quality through Experience

Strong, striking and extremely versatile, Austral Bricks clay pavers and complementing products are an essential element of any landscaping design. Our ranges offer an array of vivid colours and dynamic shapes to help create landscape designs that evoke both style and beauty. Proven to last the life of your landscaping project, Austral Bricks offer unsurpassed quality that only one of Australia’s largest and most experienced manufacturers can deliver.

Good looks and hard wearing finishes make Austral Bricks paver products suitable for stylish paving designs, pool surrounds or commercial paving projects. Their strength and durability also makes them the ideal choice for the wear and tear of high volume traffic areas, light vehicular areas and decorative streetscapes.

With most ranges being Salt Safe and Freeze/Thaw resistant, many products can be used in areas by the sea, for both salt water and chlorinated pools and regions that receive seasonal snow fall.
Clay is a natural resource which has been used for centuries because it retains its colour forever as well as its durability. With increasing usage around the world, engineers and specifiers are now appreciating the advantages of using clay products. Austral Bricks clay pavers provide excellent abrasion and slip skid resistance and can withstand heavy traffic loads.

Continued commitment to quality ensures Austral Bricks will remain the benchmark for excellence for many years to come. Our pavers are fully tested against Australian Standards for strength, abrasion resistance and slip skid resistance.

Our tradition, experience and financial strength has made Austral Bricks pavers the first choice for many Architects, Builders, Developers and Home Buyers.
Natural Stone

Enjoy the luxury of natural stone in your home.
From the striking dark colours of our Black Granite through to the light sophistication of our Limestone, you will not be disappointed with your selection.

Available in:
400 x 400 x 30mm
400 x 400 x 30 Bullnose
600 x 400 x 30mm*

*Pearl Limestone & Kota Blue are only available in 600 x 400 x 30mm
The Bowral Bricks architectural bricks have been transformed into dry pressed pavers. Manufactured using time-honoured techniques with today’s technology guarantees premium quality.

Available in:
230 x 115 x 65mm

Bowral London®
Traditional but classy
Hamlet™

Architecturally inspired.

The Hamlet paver collection will set your project apart. Whether they be used indoors or out, this special sized paver produced in the renowned Bowral colours is in a class of its own.

Available in:
230 x 76 x 55mm

Blue
Sepia
Ash
Riviera®

Riviera ceramic pavers have been designed to complement all lifestyles and home decors. Excellent slip-resistance and salt-safe qualities make Riviera pavers ideal for use around salt-chlorinated pools and high-traffic areas. Select from a range of Italian-inspired colours to beautify and individualise your outdoor spaces.

Available in:
300 x 300 x 40mm
300 x 300 x 40mm Bullnose
Everyday Life®

Discover how easy the art of outdoor living is with our new Everyday Life range of clay pavers.

Available in a selection of exciting colours to suit any personality, our Everyday Life pavers will transform your driveways, entertaining areas and pathways into your very own great outdoors. Perfect for your Everyday Life.

Available in:
230 x 114 x 55mm

Above: Everyday Life - Cream
Lite-Stone™

A light-weight natural stone facade, designed for simple installation by professionals or competent DIY-ers.

The Lite-Stone collection of stylish colours have been selected to blend beautifully with contemporary or heritage architecture for both indoor and outdoor applications.

Available in:
400 x 125mm

How to Pave.
A Step-by-Step Guide

Materials Needed

- Pavers
- Gravel Roadbase (1m³ covers 10m² at a compacted depth of 100mm)
- Washed River Sand (1m³ will cover 30m² at a depth of 30mm)
- Bagged paver jointing sand (1 bag will cover 8m²)
- String lines, tape measure and pegs
- Spirit level
- Two Screed Rails – two flat steel bars (Approx. 3m [L] x 50mm [W] x 2mm [H])
- 2-3m long concreter’s screed
- Broom, rake and shovel
- Plate vibrator compactor
- Edge restraints (concrete or timber)
- Cutting Equipment – Paver Splitter/Masonry Brick

Preparation

1. Select the desired finished surface level of your pavers. See diagram 1 above right.
2. Excavate the total area to the required depth – 140mm for pedestrian areas (compacted road base recommended) 190mm for driveways (concrete base recommended for heavy loads).
3. Be sure to allow for a slight fall for drainage. A fall of 25mm per metre should be satisfactory.
4. Place and screed gravel roadbase over area to approximately 100mm below the required finished height. (This allows 10mm for compaction).
5. Using the Vibrator Compactor, compact the roadbase.
### Bedding

1. Place washed river sand in piles over the area to be paved.
2. Using a rake or shovel, spread the sand evenly over the area.
3. Use a paver to determine your finished surface height, to ensure the correct depth of the bedding sand is used. This becomes the measure for your screeding rails. Repeat so that you have 2 paver pads at least 2 metres apart. See Figure A.
4. Using your screed, level an area between the two pavers so that you can lay your screeding rails on the level surface.
5. Place the screeding board onto the screeding rails and pull towards you, ensuring that you maintain an even level. See Figure B.
6. Once the area has been screeded, carefully remove the screeding rails and smooth out any damaged surface areas with a hand float.

### Laying Pavers

1. Select your laying pattern and commence laying, making sure that you work outwards from a corner. Where necessary use string lines to make a corner.
2. To ensure that your paving lines stay straight, both vertical and horizontal string lines should be used. See Figure C.
3. As you lay your pavers, make sure that a gap is placed between them (2-3mm for small format pavers and 4-6mm for large format pavers). This will prevent any paver damage caused by pavers rubbing against each other.

### Edge Restraints

1. Edge restraints are important as they will prevent pavers from moving out of place. See diagram 2 above.
2. The edge restraint must first be in place prior to compaction taking place.

### Compacting the Pavers

1. Prior to compacting, sweep dry paver joint sand over the paved area using a soft bristled brush. Make sure that you completely fill the jointing gaps. See Figure D.
2. Leave a small excess of sand on the surface of the pavers for the compactor to vibrate further into the joints.
3. Before compacting, make sure that a piece of carpet or rubber matt is under the compactor to prevent the pavers being scratched or damaged. See Figure E.
4. 3-4 passes with the compactor should be satisfactory. After the initial pass, respread the jointing sand over the pavers to ensure full joint penetration. Following the final pass, top up any joints with sand where necessary.
5. Hose off excess sand for a clean finish. See Figure F.

- Cut edge pieces with a Bolster

**Note:** It is recommended that all large format pavers when used in vehicle areas are bedded in either a sand and cement mortar bed or fixed using a flexible adhesive.
Products and brands available from Brickworks Building Products™

Brickworks Building Products™ is one of Australia’s largest and most diverse building material manufacturers. Under the Brickworks Building Products™ umbrella are some of Australia’s best known building materials brands.

Our products include bricks, pavers, masonry blocks, retaining wall systems, precast concrete panels, concrete and terracotta roof tiles, timber products and specialised façade systems.

With a broad product portfolio and manufacturing and sales facilities across Australia, Brickworks Building Products™ is uniquely placed to service the demands of the building industry.

With over 1200 staff across Australia and New Zealand, we pride ourselves on our commitment to product and service excellence and our leadership position.

Austral Bricks®

Founded in 1908, Austral Bricks® is Australia’s largest, best-known and most efficient clay brick and paver manufacturer. Austral Bricks® add distinct style to any type of home. Their natural colours and textures enable you to create striking façade contrasts or more traditional neutral colour tones. By investing in new technology Austral Bricks® now produce bricks with a variety of surface finishes, exciting colours and different sizes. The result is a wonderful range of bricks for you to build a stylish, contemporary home.

Bowral Bricks

When Bowral Bricks began production in 1922, a teenage Don Bradman was still scoring runs for the local side. Today their distinctive dry-pressed bricks are highly valued by discerning architects and builders across the country. The unique combination of traditional craftsmanship and modern technology will ensure that the Bowral Bricks brand will remain the benchmark for brick excellence for many years to come.

Nubrik™

With a heritage reaching back to 1862, Nubrik™ premium-quality bricks are still moulded the traditional way on century-old presses. Their time-honoured expression of authenticity and elegance is acknowledged by architects, builders and discerning homebuyers who also value their rich colour blends, solidity and crisply-defined edges.

Daniel Robertson®

Since 1853, Daniel Robertson® has helped build Australia with building products that combine craftsmanship with architectural excellence. In a world of mass production, where qualities are constantly compromised, Daniel Robertson® premium-quality clay bricks are highly prized for their unique character, earthy appeal and individual charm.
Backed by a proud history of more than a century of brickmaking experience, NZ Brick Distributors™ offers New Zealand’s most comprehensive range of high quality bricks and pavers in an unmatched palette of colours, textures and sizes, backed by a nation-wide sales and distribution network.

Austral Masonry™ is a leading manufacturer and supplier of concrete masonry products focused on providing functional but stylish solutions to the civil, residential, commercial and industrial building and construction markets.

Our passion is to create products to meet the technical and functional demands of the building industry, while also delivering architecturally striking and fashionable finishes to completed building projects. Our range of products includes standard grey concrete blocks, coloured architectural concrete blocks with a range of different finishes and a comprehensive range of retaining walls, pavers and garden edging.

In just a few years, Austral Precast® has become Australia’s premier supplier of high-quality, innovative and customisable precast concrete product solutions. Using state-of-the-art technology, production techniques and systems, our precast division produces a diversified range of wall, floor, column, and client-specific precast solutions. To meet the construction industry’s ever-increasing demands, the company operates from five plants located along the eastern seaboard and in Western Australia.

From production facilities in Western Australia, Victoria and the ACT, Auswest Timbers® manufactures a diverse range of timber products. Jarrah, karri and chestnut timbers are processed into a range of decorative, seasoned products for furniture and joinery, flooring, decking, staircase components, veneers and fence screening. Green structural timbers are also processed for mine, wharf and rail track construction, as well as for floor joists, roofing timbers and roof tile battens.

For almost a century, Bristile Roofing™ has delivered stylish and innovative roofing products for Australian homes. Bristile is now one of Australia’s largest manufacturers and installers of quality roof tiles and the exclusive Australian distributor of La Escandella premium-quality terracotta roof tiles from Spain. Product innovation, manufacturing expertise and first-class service guarantee a strong, low maintenance roofing solution that will look great and perform superbly for generations.

Facade systems are a cost-and time-efficient approach to cladding commercial and upscale residential buildings. The Terraçade™ system, developed in Australia by Brickworks Building Products™, combines the visual appeal and colourfastness of terracotta with the low maintenance and functional efficiency demanded in today’s competitive market.
